

Muhammad Afzaal

Azure Cloud Administrator | Infrastructure & Identity Support

Brooklyn, NY | 347-615-0230 | ma@muhammadafzaal.com | muhammadafzaal.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Azure-focused IT professional with hands-on experience in cloud infrastructure, Entra ID identity administration, networking, storage, and PowerShell automation. AZ-900 certified and preparing for AZ-104 (Azure Administrator).

TECHNICAL SKILLS

Cloud & Identity (Azure): Entra ID, Virtual Machines, App Service, VNets, NSGs, VNet peering, Load Balancer, Bastion, Private DNS, NAT Gateway, Network Watcher, Storage Accounts, Blob Storage, Azure Files, SAS, Azure Monitor

Systems & Automation: Windows Server, PowerShell automation, Azure CLI, Ubuntu Linux, Nginx, IIS, MariaDB, Bash, GitHub

Networking & Support: TCP/IP, DNS, CIDR/subnetting, routing, ports/protocols, connectivity troubleshooting, web hosting, business email, client support

AZURE CLOUD PROJECTS

Azure Segmented Network Infrastructure

[GitHub](#)

- Built two peered VNets with private Ubuntu VMs, Web/API/database subnets, NSGs, Bastion, Load Balancer, Private DNS, and NAT Gateway; used Network Watcher, curl, and nc to isolate and resolve NSG, UDR, and peering failures.

Azure Multi-OS Compute Infrastructure

[GitHub](#)

- Deployed and troubleshot Ubuntu and Windows Server VMs running Nginx and IIS; managed disks, snapshots, and Azure Monitor alerting, and configured persistent Linux storage using UUID/fstab.

Azure Storage and PowerShell Lab

[GitHub](#)

- Configured Blob Storage and Azure Files with secure transfer/TLS and lifecycle management; wrote and debugged Azure PowerShell automation scripts, including a short-lived user delegation SAS, and traced an App Service deployment failure to an East US F1 quota limit.

PROFESSIONAL EXPERIENCE

Freelance IT & Cloud Support Specialist

2024 - Present

Self-Employed | Brooklyn, NY

- Provisioned and managed an Azure Windows VM for a client workload, implementing snapshots and a secondary VM for data protection and disaster recovery.
- Hosted and maintained a client website on Azure App Service, configuring hosting and DNS and resolving availability and connectivity issues to keep the site online.
- Managed domain transfers, DNS, nameservers, and business email setup and account administration — including access provisioning and device-related support — directly for the client.

CERTIFICATIONS

Microsoft Certified: Azure Fundamentals (AZ-900) | Microsoft Azure Administrator (AZ-104) - In Progress

CompTIA A+ | CompTIA Network+ | CompTIA Security+ | ITIL Foundation

EDUCATION

B.S. Information Technology - Western Governors University | 2026

A.A.S. Computer Information Systems (IT Support) - Oakland Community College | 2024
